

Question 30 · Unit 2 · 8 Marks

Apply the concept of HRD subsystems to propose a development path for an employee identified as having future leadership potential.

Answer

A high-potential employee needs an integrated path using all major HRD subsystems, not a single training programme.

- 1. Potential appraisal confirmation:** Use multiple inputs (boss, assessment centre, track record) so the label is valid.
- 2. Career planning:** Map 3–5 year possible leadership roles and competency gaps versus those roles.
- 3. Performance appraisal:** Keep current-job excellence while adding leadership behaviour goals (delegation, coaching, decision quality).
- 4. Training and education:** Mix of conceptual programmes (strategy, finance) and skill workshops (communication, conflict).
- 5. On-the-job stretch:** Job rotation, project leadership, deputy roles—potential is developed mainly through experience.
- 6. Mentoring and counselling:** Senior mentor plus regular counselling to handle transition stress and derailers.
- 7. Feedback:** 360-degree or frequent stakeholder feedback to correct early.
- 8. Review:** Annual potential re-appraisal; if progress stalls, revise path. Align rewards so development effort is recognised.

Conclusion. *This path uses interrelated HRD subsystems to convert identified potential into ready leadership capability.*
